% JUNE Sales Gain er greatest previous Nash June

Rounding into the last month of the half year period Nash sales and production raced thru June to pile up a 60% lead OVER the greatest previous volume of June business in all Nash history.

And this record-breaking total also made June 1926, the 22nd consecutive month-with one exception-to surpass the mark set by the same month of the previous year.

The reason Nash is getting the business is simply because people are buying where they get the MOST for the money-in greater VALUE, in greater QUALITY, and in finer PERFORMANCE.

Making Enemies of Prohibition.

Justice Stoll's course in frecing a local citizen arrested on a charge of selling in toxicaling Fquor and the holding of the Colum hus dry entorcoment officers who are charged with beating him up with a blacklack should be commended by citizens who believe in jus tice, whether such citizens may be wet or dry in their leanings. The justices finding was that no case had been made against the ac cused, that, so far as he was able to glean the showing made against him was weak *broughout and in no way established the accuracy or truth of the charge made against

On the other hand the holding of the dri enforcement officers who are alleged to hav essaulted him will give the Columbus dry en forcement headquarters a rather strong hint that Marion doesn't appreciate rough house methods and that they will not be intersted lere, especiali under such circumstances and conditions as those alleged to have obtained in connection with the case in question

The story told by one witness of the local citizen s arrest-a witness at least supposeting dirinterested ... is a sad commentary on the Columbus dry headquarters conception of the proper enforcement of the law. If one half of his story is true the very idea it portrave is nauseating According to his tale the dry officers were consistent violators of the law they are paid to enforce and they overlooked repeated offeness of others in addition to their own, not only here in Marion but also in Bucyrus, to come back here and a rest citizen the case against whom was so films that it was practically thrown out of cour!

Cases handled as the one in question was shown to have been handled do more barm to the cause of prohibition and law enforcement in a day than wet propaganda could in a rion'h Maney expended for such dry enforcement simply carries aid and comfort to the enem'es of prohibilion

The effering to stocknolds a which totaled \$151 117 500 carried above is nearest road tre niled States Breek t -fora fon at en has rit etanding capital strik of \$ 5 master)

The \$29 966 969 additional stock was issued is furtherance of the point art, ed by th Bell system to allow the employes of the en the system to share in the profits of the porent company. It is listed under the employes nurchasing plan insururated something like like lears ago in which the president of the company from time t time fixes he grice a which employer may hip which a sixays a sixe under the price the stock commands in the open market. This price natural / has ad senced as the strok has enhanced in value. In the early part of 1924 it was \$115 he latter part of that year 1 was \$11n 1 raised to \$121 the first of last year and has been \$1 , since May 31 1925

More than 140,000 santarts and par ticipating in the plan at the orginning of the present year and at the last annual meeting case 5 000 were stockholders of record hold ing something more than 553 000 charge of alock. Sitseriptions for 251 000 and some odd shares were received last year and with the steady demand on the part of employes for more alock the additional 120 900 095 wars Isrued

Employee who has been with the Bell employer wat no because are given a continuous opportunity to subscribe for the sicek hul no employe can buy more than att. alares in any one year lieductions from wage or salary are made of reputer internals until the purchase price is paid. When paid p the shares are issued and corv the priff leges of all nuistanding shares. The consent no public utility commission is necessary for the issue of such slock

The Bell system is far from the first to ndopt the plan of disposing of its capital stock to employes it was in use long before its ndoption by the Reil people. There are a num ter of local interests which adopted it or a similar plan tears ago among them being the predecessor of the company publishing this paper. The local telephone company is an other notable example as is also the Prender grat company in fact the excellence of the policy has long been recognized in the local industrial and commercial world. But it is a eignificant fact that the corporation with the Przest pulaten ling afork holdings has adopted it and found it valuable no valuable that it has increased its slock \$20 000 000 to most the demands among his employes for stock

To our mind this participation of employee In the earnings of corporations is one of tha healthies, symptoms of the times li means a sweeping away of the line between labor and ipital and strengthens the trend toward better understanding. Carried on illi every employs is a sharsholder it means the entire obliteration of the line it means that the in terests of capital and labor are one for the cason that capital and labor have become one Too much can not be said in praise of the es atem

ody has said the way to lose the picative out of life is to put too much pleasure into 't People in 'ven England are proud of the contribution of their forefathers to the American democracy. They believe that the Pilistrima insented this government. As a matter of fact the ment and women who landed here in 1820 and those who came for a hundred vearafiter were tool very much interested in democracy freedom and all that sort of thing. They didn't believe men who didn't own properly had any right to vote they were pretty much ruled by their preachers and they were very hard on the Index dog includits the Indian As to religious freedom; and some of them really meant by that was the right in worship as they please and make everybedy else do the same.

But this broad country far horizons good sound hardships and the hard fist of necessity made a wondrous change in our forebears. They developed into great folks. With their development came the development of damural, institutions free schools and the like Hut they didn't come here possessed of all these things. They began on a small same that they made many false starts. Among their false starts was the experiment in burning witches and then praying about it.

God probably understood the Puritans better than they understood God. So He let then live and develop into great people.

Today's Worst Story.

Today's Worst Story. BY WILL ROGERS

The worst joke I heard today was told to me by Mr Robbine Warren. He is the charge (taffairs next to the ambassador, down in Rome. He has been stationed all over thy sold at some time or another for us. His wife is very pretty and is an Argentine and herr children are at school outside. Boaton somewhere. He has an awful lot of clothes you have to change clothes a lot when you are none of these embassies. It you go to talk to a man in the morning about his country and yours not going to war for a few days yet we, you have to have a different kind of this than you would if you went to see him two cours later on the ame subject. A husiness, sait you are not allowed to laik diplomacy in ha. That will get you in war quicker man arything. He told an amusing little story of two kinds playing. One little fellow said to the nice.
